About the Conference

Thakur College of Engineering and Technology (TCET) created IC-HSTE under the purview of MULTICON-W a decade ago to provide a platform to explore all upcoming research. TCET has successfully hosted 14 consecutive international events. With the goal of expanding their horizons, the 15th Annual International Conference is being launched as a prime platform for academicians, researchers, and professionals associated to humanities, sciences, and technical education to present their research contributions and exchange ideas. The Conference on Humanities, Sciences, and Technical Education (IC-HSTE-2024) is a specially designed cluster conference that will provide an interdisciplinary platform for researchers and educators to present and discuss recent innovations and trends, along with practical challenges faced and solutions adopted in the field of Humanities, Sciences, and Technical Education. We are confident that the conference contributes significantly to knowledge in numerous disciplines, enhancing our problem-solving abilities and nurturing our creativity. The conference also aims to bring together the perspectives of these diverse but related domains of knowledge in the aspirations of mutual growth. All papers are subjected to peer review process. Best quality papers with research claims will be published as per policy of journal. Further selected quality papers will be published in Scopus and Web of Science Journal in monthly issue. Remaining papers will be published in conference proceedings. The topics of interest for the conference tracks include but are not limited to the following:
